

# Exhibits for those with impaired vision

## Geo-Cosmos

This six meters globe is suspended in the atrium. Walk the slope that surrounds it, and imagine its size.

3F

## Paro, the therapy robot

This is seal-shaped robot. If you stroke it, it will murmur, and shake its head.

\* Please call staff if you cannot touch the robot.

## This is ISS, go ahead

This is "house" for people to live 400 km above Earth. Find the devices designed for living in microgravity.

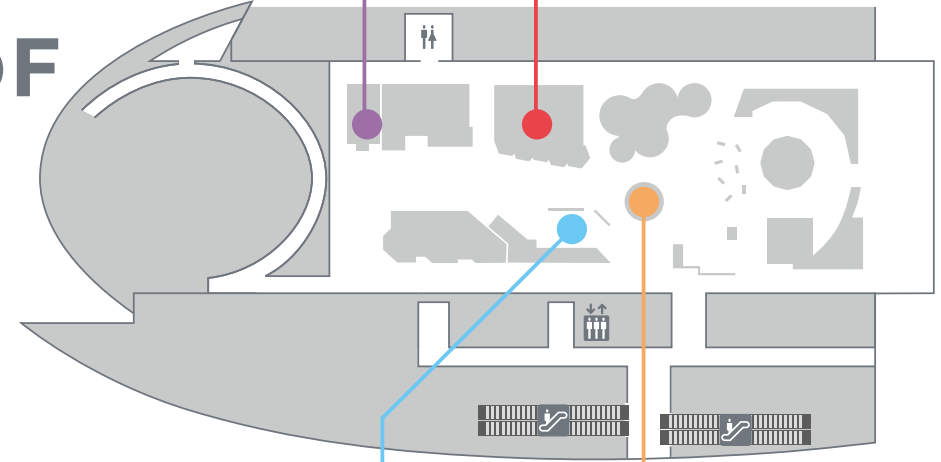

## CELLS in Progress

Touch and experience a life-sized model of a baby as it grows inside its mother's stomach.

5F

## Co-Studio

This area holds a variety of activities, including electronic constructions experienced through sound.

\* Please inquire about the content.

## LE-7A engine

This is the actual engine used in the H-IIA rocket. Walk around it, and feel the engine's actual size.
