

Exhibits for those with impaired hearing

Geo-Cosmos

This is a huge globe, six meters in diameter, which allows you to see the Earth as seen from space.

A Hands-On Model of the Internet

Have a look at this structure, which uses black and white balls to visualize digital signal movement on the Internet.

This is ISS, go ahead

See space food and a toilet for people living 400km above the Earth. Imagine life in space.

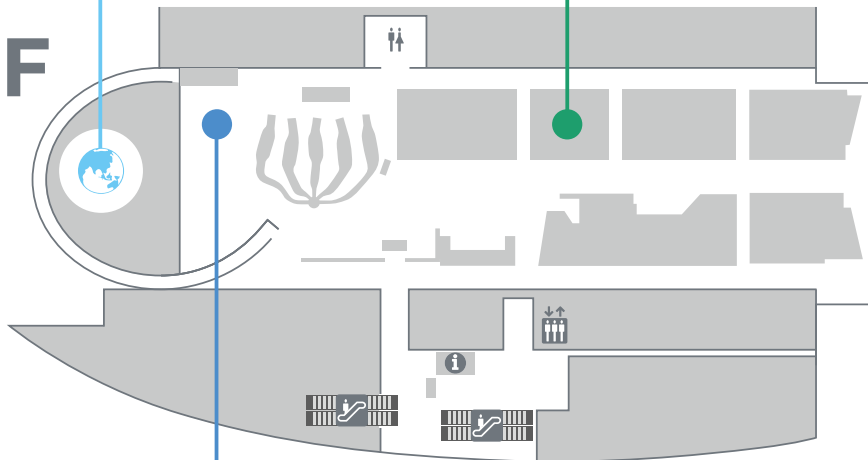

Mission Survival: 10 Billion

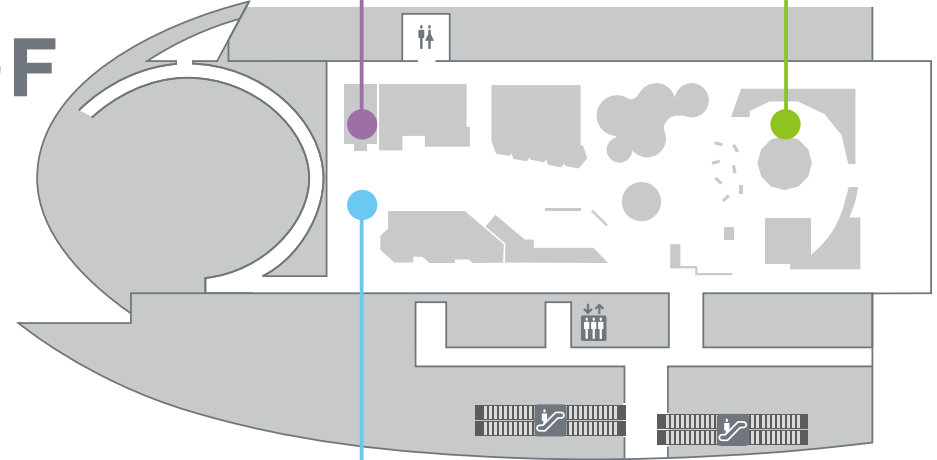

Here, you can understand disasters such as earthquakes, and think what you can do to survive.

Paro, the therapy robot

This is seal-shaped robot. If you stroke it, it will murmur, and shake its head.

* Please call staff if you cannot touch the robot.

ASIMO Demonstration

The humanoid robot ASIMO runs and sings.

*Demonstrations start at 11:00, 13:00, 14:00, and 16:00 (each performance: 10 minutes).

Geo-Scope

This is a touch panel you can use to see Earth-related data, such as climate change and predictions for the future of the earth.
